EDUCATION

Bachelors Degree of Information Technology — Completed 2015
Griffith University

High School Certificate of Completion — Completed 2010
Runcorn State High School

Cetificate II in Business Communication Technology — Completed 2010
Runcorn state high School

Certificate III of Information Technology — Completed 2009
Axiom College

TECHNICAL SKILLS

Languages

C#, Java, HTML, CSS, Javascript, JQuery, AJAX, AngularJS, JSON, XML, SQL, PHP, ASP.NET, C++, Python

Frameworks

Bootstrap, Ionic, Wordpress, MySQL, Meteor, .NET

Software

Unity 5, Unreal Engine 4, Adobe CS6 (Photoshop, Flash, Dreamweaver, etc...), MS Office (Word, Powerpoint, Outlook, etc...), Visual Studio 2015, Netbeans, Eclipse, XAMPP

Tools

Github, Bitbucket, Team Foundation Server, C9 IDE, Nitrous IDE, Slack, Trello

CORE SKILLS

Project Management

- Highly developed research and analytical skills with a strong capacity to conduct independent research

- Demonstrated ability to develop goals, objectives and implement strategies enhanced through planning, research and experience

- Proven ability to conceptualise problems and develop well-reasoned and integrated solutions

Adaptability

- Ability to adapt to different working contstraints evidenced by having worked on projects across a variety of platforms

- Ability to adapt to different working environments to meet project needs such as working independantly or in teams of various sizes.

Communication

- Received positive feedback regarding style and delivery of presentations at university, demonstrating robust oral communications skills

- The role of Website Developer showcased effective business writing skills when translating technical reports to ensure clarity and brevity for a non-technical audience

- Quickly built strong customer links resulting in my university final project, shown by proving ability to listen and understand customer needs

- Quickly built strong team communication skills in my time at Humble Sage Games, ranging from assets negotiation between teams to team members tasks and needs gathering and communication to ensure everyone had what they needed.

Initiative and Creativity

- Developed highly creative skills by designing and implementing a small business website for access by customers and investors

- Constantly working on side projects by myself or with a friend in my spare time to increase my experience and skills (shown in my portfolio).

WORK EXPERIENCE

Web Developer   Feb 2016 — Apr 2016
AA Specialised Solutions - Brisbane

Responsibilities

- Create a website part-time for their new agency with an overseas company
- Created the website content including design, graphics, links, forms ensuring cohesion, functionality and aesthetics
- Maintained and updated the website as new products were introduced

Achievements

- Return business
- Reference for my time working with them

C# Programmer / Game Developer   Oct 2015 — Feb 2016
Humble Sage Games - Brisbane

Responsibilities

- Plan and Develop a first person shooter game with the ability to be networked
- Employ a lobby system for players to connect to and set game setting
- Asset management and task allocation to members of the art and sound teams
- Design and implement basic health and damage systems along with perks and modifiers

Achievements

- Lead position for the games' development
- Agreed to be a reference for my time woking there

Programmer / Web Developer   Feb 2015 — Jun 2015
Paul Aroney - Brisbane

Responsibilities

- Create a website as part of my final year group project for a client project which was bid for
- Have weekly meeting with the client to establish clear understanding of needs and requirements as well as inform them of progress
- Maintained and updated the website
- Convert the clients complex manual system into a dynamically updating online database driven system

Achievements

- My group getting first choice for the project despite the competing groups
- Finishing the website on time and while meeting the clients needs despite being the only programmer in the team and having to spend aprox. 600 hours for its completions
- Fantastic reference for my work on the project
- Getting a distinction for the subject

Web Developer

Apr 2014 — May 2014

AA Specialised Solutions - Brisbane

Responsibilities

- Create a website part-time for their application business
- Created the website content including design, graphics, links, forms ensuring cohesion, functionality and aesthetics
- Maintained and updated the website

Achievements

- First real client reference

PROFESSIONAL DEVELOPMENT

Australian Computer Society

2015 — Current

Student Member

Project Management Institute

2015 — Current

Student Member

INTERESTS

I am very interested in learning as much as I can in computer based technologies and improving my skills in platforms such as web and game development. I have spent the last few years slowly learning how to develop my own projects in the hopes of own day starting my own company. I love the concepts and complexities behind the design and functionality of these computer based softwares and the possibilities of what I can some day make with them.

To Whom It May Concern

Reference for Sebastien Latouche

During the period 2005 to 2010 I successfully established and managed a small business in the north coast of New South Wales which grew to become one of the largest suppliers and installers of solar water heaters and solar power systems in Australia. Prior to that I had 20 years of experience with leading international consulting firms in the implementation, management and support of financial and ERP systems, including SAP R/3. My particular areas of expertise and experience during this period were analysis, design and implementation of management reporting and costing systems, project management of mission critical application projects and the establishment and management of ERP Application Management Services.
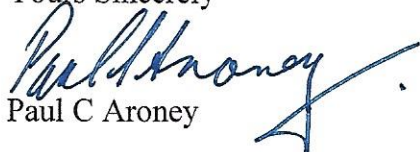

Although now nominally retired I am actively engaged in the design and development of a new methodology for handicapping yacht races and a prototype computer system, called Fair Winds, to implement it. One graphically intensive component of our Fair Winds system, called Fair Profiler, was offered to Griffith University undergraduates and a team of 4 students undertook this as a final year project. Sebastien Latouche was responsible for programming, with other roles being project management, design and testing.

Sebastien has proved to be a very talented programmer as well as pleasure to work with. He:

- clearly understood our complex requirements in an environment unfamiliar to him
- researched and found novel ways to address tightly defined requirements
- was responsive to end user input and advice
- met all schedules on-time, including optional components only expected to be completed in the most favourable of outcomes
- exhibited excellent technical knowledge and was able to clearly explain it to informed but not up to date client

I believe that Sebastien's good work ethic, natural talent and developed skills, together with his ability to create good working relationships will stand him in good stead for any technical role he undertakes. I heartily recommend him to any prospective employer

Yours Sincerely

Paul C Aroney
